(Maximum road width we spray is 20 feet)

PRICES INCLUDE TAX

Calcium chloride is produced from natural brine deposits found underground. It attracts moisture; this is what makes it an excellent dust control agent.

SFG does NOT guarantee complete suppression of dust, because of weather, traffic and road conditions may affect the treated area. Two applications are highly recommended. It is dust control, not complete dust elimination.

Flags may be picked up at SFG – Knoxville and Albia Offices, and Monroe County Engineer's Office. Flags must be in place and clearly visible from April 1st to October 1st. Flags should be placed approximately 6' from

the edge of the road on the traffic side for easy visibility. Failure to maintain flags may result in the loss of dust control.

Our trucks are equipped with computer equipment that measures the exact footage being sprayed. If the flags are not set to the correct footage purchased, we will go to the purchased footage. If the area is not marked by flags the driver will use their best judgment for the treated area.

Weather permitting and with county approval, we plan to apply dust control after the 10th of May & July. Product SDS sheets are available upon request at Smith Fertilizer & Grain.

CUSTOMER RESPONSIBILITIES PER COUNTY

- 1.) The calcium chloride will be applied by the contractor you choose. Monroe County will coordinate their work with the dust control applicators. Each applicant will work directly with their own applicator.
2.) Applicator/contractor will give sufficient notice to the Monroe County Engineer or designee prior to the intended application of approved dust control product in order that the road can be bladed and shaped by county equipment. Monroe County will determine and does not guarantee there will be granular resurfacing before the application of the approved dust control product.
3.) If, following the application of approved dust control product, county personnel determine that the section of treated road needs to be bladed, granular resurfacing, scarified, or shaped it will be done without notice to the applicant and without liability for the cost of any new dust control application.
4.) The approved application grants the applicant permission to place calcium chloride on the public roadway for the purpose of dust control, the cost of which is to be borne by the applicant.
5.) Any and all complaints regarding the performance of the dust control product shall be directed to the applicator, not to Monroe County.
6.) Monroe County has implemented a \$50 application fee. Contact Monroe County with any questions.
